

Get to know us

The Center for Classical Homeopathy has 20 years of experience in the organizing of qualitative training in homeopathy. Its strength is in selecting the best tools available and presenting them to the trainee in a well ordered and thought off way.

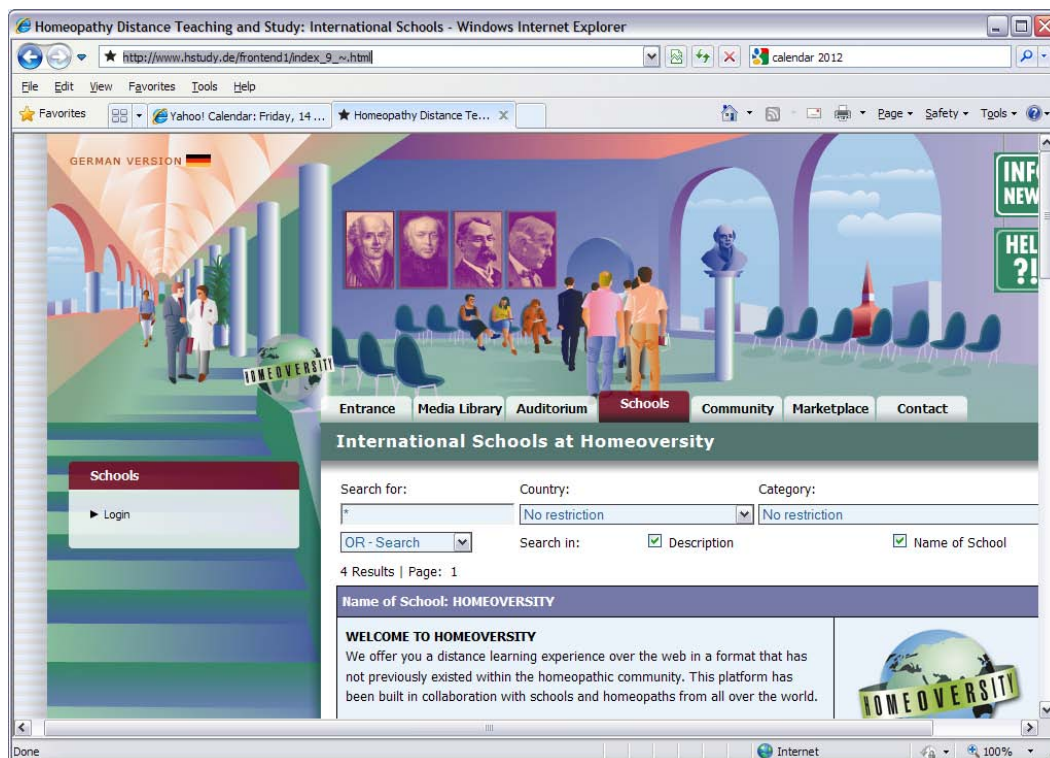

The student is guided through the material and gradually exposed to wider and deeper knowledge of philosophy, materia medica and method. To keep up with the enormous amount of homeopathic comprehension and using 21st technology to educate and inform as many interested minds as possible, the CKH starts with a series of **online lectures available on demand** on the latest and most refined tools of our profession. A basic knowledge of homeopathic philosophy, being acquainted with the materiamedica of our major polychrests and having read the Organon are the requirements to step into this whole new world of classical homeopathy.

This is a manual to guide you through the different steps to preview, register and buy the sessions on the Vital Approach, a system developed by Anne Vervarcke, founder of the CKH, teacher and practitioner for over 20 years.
