Understanding Destructive Disease and Pathological Disturbance

Lalor illuminates the *Sensation* of the case. Lalor will illustrate through understanding the psychology within disease states how to arrive at the delusional disturbance within the first thirty minutes of the consultation. Lalor brings to her teaching thirty years of clinical experience in counselling and somatic psychotherapy. The purpose of understanding psychological stages is to match the simillimum to the psychological presentation of your patient's delusional state. Lalor's psychological insight into the mental and emotional disturbance in patients suffering chronic disease has been the catalyst to this ground breaking lecture.

Day One: Auto-immune diseases, Lupus, Rheumatoid Arthritis, Thyroid antibodies, Chronic fatigue syndrome, and Cancer.

Day Two: Post Traumatic Stress Disorder, Neuroses, Psychoses, Catatonia, and Hysteria in relationships.

The remedies covered will be *Anhalonium, Arnica, Baryta carbonica, Carcinosis, Ignatia, Lachesis, Luna, Mercurius, Muriaticum acidum, Natrum sulphuricum, Spongia, Syphilinum, Thuja, Veratrum album, and Zincum.*

Using video cases Lalor will teach how to *probe and discover* the primary formations of disturbance within the case-studies which are the precursors of the patient's present pathology. Lalor will illustrate how to find the 'never-well-since-event' inherent within their destructive disease state. Participants will learn how to identify and understand the symbiotic relationship between the mental and emotional disturbance, and physical pathology inherent within destructive or life-threatening diseases. Lalor's psychological insight into the mental and emotional disturbance in patients suffering with chronic disease has been the catalyst to formulating an innovative program which teaches homoeopaths how to repertorise using *Delusion* rubrics.

Understanding Destructive Disease and Pathological Disturbance

If you have been struggling for sometime in the expanse between the sensation of the case and the theme then this repertorising program designed by Lalor, and developed for OPUS Radar™ will provide some clear and simple answers to your case-taking dilemmas. Lalor's software has been designed to provide a *clear and practical* case-taking bridge between the unusual disturbance of the case and the *Sensation*. Lalor teaches homoeopaths how to use simple counselling techniques to ask leading questions which will elicit leading answers. This lecture will provide homoeopaths with *clear and practical* case-taking techniques and case analysis.

Prerequisites: Synthesis and/or Radar™ is the preferred repertory.
